***Election/Restrictions***

This is a restriction in response to communications filed by Applicant on May 25, 2005. Claims 1-22 are currently pending and have been addressed below.

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-13 and 21-22, drawn to a method and a system of operating a vehicle control system.
- Group II, claim(s) 14-20, drawn to a driver interface.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I comprises the system (and the corresponding method) for operating a vehicle including all its vehicle subsystems. In contrast, Group II merely constitutes a driver interface, and does not include any vehicle subsystems to be controlled.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 3664

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
